PROFILE SUMMARY

Ambitious and self-motivated web developer with a solid foundation in web technologies and a strong passion for creating user-friendly and accessible web applications. A quick learner with excellent problem-solving skills, capable of adapting to new technologies and environments efficiently. Possesses self-discipline, a collaborative mindset, and the ability to work independently to deliver high-quality results.

PROJECTS

Weather-Forecast-Website

A dynamic weather forecast app that provides real-time weather updates for the current day and a 5-day forecast. The app allows users to search for any location or automatically detect their current location.

Features:

- Search by Location: Users can input a city to view weather details, including temperature, humidity, and wind speed.
- Auto-Location Detection: Integrated Geolocation API to automatically fetch weather data based on the user's location.
- 5-Day Forecast: Displays detailed weather conditions for the next five days.
- Responsive Design: Ensures usability across devices with a clean and intuitive UI.

Tech Stack: React | Axios | Node.js | Express.js | OpenWeatherMap API | Geolocation API | CSS

Areas of Responsibility:

- Integrated OpenWeatherMap API for real-time weather data fetching.
- Developed frontend using React, including search and display components.
- Implemented geolocation-based weather detection using the Geolocation API.
- Built and configured a Node.js backend to manage API requests.
- Designed a responsive user interface for enhanced user experience.
